

Capture

OnTheGo™

OL™ Software

Carry your forms... **NOT the paper**

Corporate documents have never been so light and easy to take around.

Design

Design your html forms and use data from your various systems.

Connect

Distribute them to people on the field.

Enrich documents with data, geolocation (GPS), handwriting & photos

Forms are viewed and completed.

Confirm validity before sending.

Capture

Send data back to your systems securely

Captures and stores data as soon as it arrives & trigger any process.

Trigger processes, archive and exchange

Capture OnTheGo The «must-have» solution for Field Force Automation

A comprehensive toolkit that gives you full control to access all your documents from start to finish. Once signed-off, they are sent back to the system immediately.

Attachments such as photos, hand-written annotations, geo-location or any information that is relevant to the file can also be easily added.

Offline mode

What happens when there's no Internet connection?

Documents and forms can be filled in and queued for submission until Internet access is available on your device, and will be sent right away.

Secure document sharing

Your list of documents and forms that are ready for download are pushed to the mobile application and will remain available in the user's library even when offline.

What's more, users and user groups can be easily managed so that they only have access to what they are entitled to, and what is relevant for them.

With Capture OnTheGo, documents can also be sorted and searched by client name or category.

Features

Mobile application

- Offline library
- HTML Form and offline data validation

Wireless printing

Web Admin Panel

- Home screen to manage repository, users, user groups, documents and other parameters
- White label to enable application branding

Workflows automation, to and from the Mobile application with PlanetPress

File sending with multi-media content

Online and offline modes

Icons to visualise documents' status

Multi-media content

When submitting the filled-in form, it is possible to attach additional information such as signatures, pictures, handwritten annotations and geo-location coordinates.

Infinite action sequences

Thanks to its workflow automation feature, subsequent actions and processes such as company system updates (e.g.: CRM) or invoicing can be triggered by submitting a form.

Preserved bandwidth

Because only input data needs to be transferred, you save a lot of bandwidth, ultimately allowing high-speed data transfer.

AN EXTENSIVE MAINTENANCE PLAN

OL™ Care

- Updates & upgrades
- Technical support

Typical verticals

- ✓ Retail
- ✓ Field Services
- ✓ Distribution
- ✓ Any business
