

+PReS Enhance

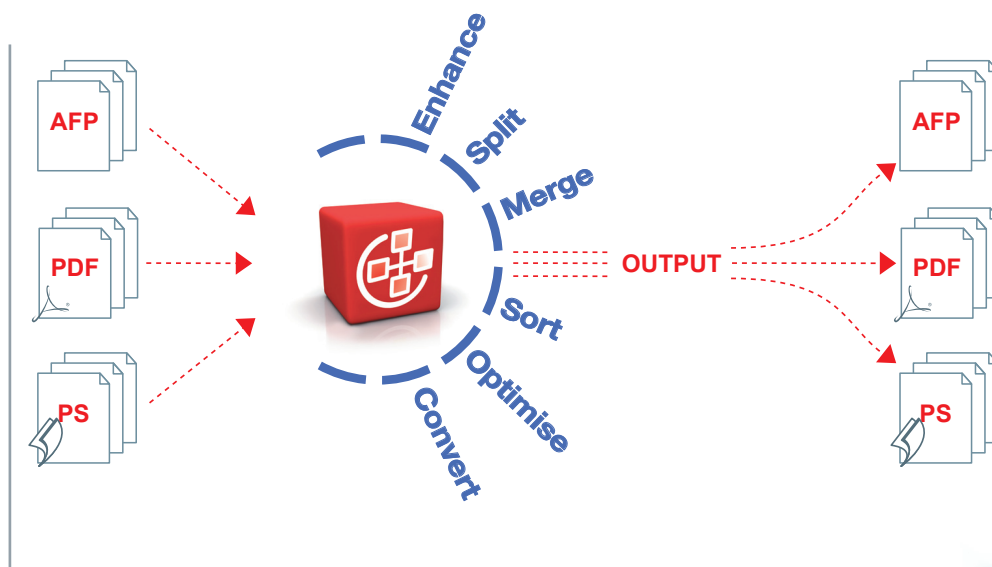

Have you ever been asked to print preformatted documents only to find that your current technology & processes make the job more effort than it's worth?

Have you ever had to ...

... print 1000's of one off documents manually?	Yes	No
... print using non-optimized output?	Yes	No
... print the sections of a large document in order to staple, or duplex?	Yes	No
... sort documents before printing?	Yes	No
... group documents into those that fit in an envelope and those that don't?	Yes	No
... add or change OMR marks on documents in order to make them work on your equipment?	Yes	No
... transform your supplied documents in order to print them on your own equipment?	Yes	No
... or wished you could convert A4 documents into imposed documents that will work on your printers?	Yes	No

If the answer to any of these questions is **YES**, then **+PReS Enhance** could be just what you need. With **+PReS Enhance**, you can solve all of these issues and accept the jobs that you might otherwise reject.

+PReS Enhance is a software application that takes in a wide variety of document streams, allows you to modify, sort, group and enhance them before outputting them in the format of choice, optimized for your production environment.

When your business depends on processing time.

+PReS Enhance gives you the flexibility you need to quickly adapt to change and automate your document composition workflow routines. It will help you reduce your labor costs, optimize your production processes and increase your productivity.

We have the right solution for you.

With +PReS Enhance, you can select the license that is right for your business:

	Express	Business	Enterprise
Input			
PDF & PostScript	X	X	X
AFP			X
