

Performance Packs

Giving you better productivity when you need it

What are performance packs?

Performance packs are options that can be added to your OL Connect licences. They increase key productivity settings to help you get better performance.

Performance packs give a boost to two different productivity settings: Parallel Jobs and Speed

- Parallel Jobs are the number of jobs that can be processed simultaneously
- Speed is the maximum speed of print, email, web or mobile output creation

OL Connect can balance the number of parallel jobs with speed to ensure that your productivity is optimised. These configurations can be modified if ever the need arises, ensuring our customers remain in control of their systems and processes.

How it works

Parallel Jobs use the power of your computer to process multiple jobs at the same time resulting in faster end to end processing, saving time.

Speed determines the maximum rate at which each job is generated allowing more jobs to be processed in the same time, improving productivity.

PlanetPress® Connect

Transactional business communications

- Automation
- Medium volume
- Recurring jobs
- On-demand needs
- Day to day operations with rare peaks

	Parallel Jobs	Maximum Speed*
PlanetPress Connect	6	3,000
+1 Performance Pack	7	7,000

PreS® Connect

Enterprise communications

- Automation
- High volume
- Multiple complex concurrent jobs
- Peaks management with very high volume
- Need to eliminate bottlenecks
- Clustered environment

	Parallel Jobs	Maximum Speed*
PreS Connect	16	10,000
+1 Performance Pack	24	20,000
+2 Performance Pack	32	40,000
+3 Performance Pack	64	80,000

PrintShop Mail Connect

Promotional communications

- One-off-non-recurring jobs
- Small batches
- Optimized speeds

	Maximum Speed (subscription license)*	Maximum Speed (full license)*
PrintShop Mail Connect	250	1,000
+1 Performance Pack	1,250	3,000
+2 Performance Pack	2,250	5,000
+3 Performance Pack	3,250	7,000

Capture OnTheGo®

Mobile workforce automation

- Design your own forms
- Initiate workflow from a mobile device
- Host your own information for security

	Parallel Jobs	Maximum Speed*
Capture OnTheGo Starter	4	300
+1 Performance Pack	5	750
+2 Performance Pack	6	1,800

*Maximum speeds relate to the final output creation stage of any job which means they apply to the creation of print (pages/minute), email (per minute), mobile & web pages (per minute) after all pre-processing steps have been completed. Complex documents will reduce maximum speeds as will underpowered computer hardware, so they cannot be guaranteed. Optimising templates and processes as well as increasing hardware (RAM, CPUs, SSDs etc.) will increase the speed of processing jobs. PreS Connect supports the ability use multiple PCs in a cluster allowing lower specification computers to help with performance.
